

## Windows Mobile 5

---

To configure IMAP for your Windows Mobile 5 device, just follow these steps:

1. Go to **Settings>Forwarding and POP/IMAP** and enable IMAP in your Gmail settings.
2. Open the Start menu and select **Messaging > New Account...**
3. Select **Other (POP3/IMAP)** for your e-mail provider and select **Next**.
4. Enter your name as you want it to appear in sent messages.
5. Enter your Gmail address (including '@ your\_domain.com') in the **E-mail Address field**. Google Apps users, enter your full address in the format 'username@your\_domain.com.'
6. Uncheck 'Attempt to obtain e-mail settings from the Internet', and select **Next**.
7. Enter your email address (including 'username @your\_domain.com') in the **User name** field.
8. Enter your email password in the **Password** field.
9. Leave the **Domain** field blank, and select **Next**.
10. Select **IMAP4** for the **Server Type**.
11. Enter a descriptive name for account in the **Account name** field.
12. In the **Network field** select how you want the device to connect to the Internet to access Gmail IMAP, and select **Next**.
13. Enter 'imap.googlemail.com' in the **Incoming Server** field, and check **Require SSL connection**.
14. Enter 'smtp.googlemail.com' in the **Outgoing Server** field, and check **Outgoing server requires authentication**.
15. Select **Outgoing Server Settings**.
16. Make sure 'Use different user name for outgoing server' is NOT checked.
17. Make sure 'Require SSL Connection' IS checked.
18. Select **Done**.
19. Select **Next**.
20. You can change how much mail is downloaded to the phone. Adjust these preferences if desired, then select **Next**.
21. Select how often you want the device to automatically check for new messages, and select **Next**.
22. Select **Finish**.
23. Check our recommended client settings, and adjust your client's settings as needed.

## 24. Google Email Uploader

---

25. The Google Email Uploader is an open source desktop utility for Microsoft Windows. It uploads email and contacts from desktop email programs (like Microsoft Outlook®) into your Gmail mailbox. It preserves information such as sent dates and sender/recipient data, as well as the folder structure used by email programs.
